

ROAD BLOCKER

MECHANICAL TIRE-KILLER

*RELIABLE, PRACTICAL AND COST-EFFECTIVE SOLUTION TO
PROVIDE 100% SECURITY OF YOUR TERRITORY*

Mechanically driven tire-killers will be the best option for places, where is no possibility to connect the electricity. TiSO offers two types of such devices: with springs or with lever drive. In first case – spikes are always in raised position and pushed down by tires. In second – knives can be closed by rotating lever, or by joining (connecting) it with barrier. In this case, you get device which works synchronously with barrier. Models with installation on road surface or with submerge are available.

Installation areas

- Governmental Institutions
- Military Bases
- Nuclear Power Plants
